Kash Shaikh

Director, Marketing, Networking
Hewlett-Packard Company

Kash Shaikh is director of Marketing for Networking at HP. He is responsible for product marketing strategy and execution for the Networking Infrastructure portfolio, including switching, routing, wireless LAN and network management products.

Previously, Shaikh worked at Cisco for more than four years, where he directed the data center switching solutions and product marketing teams. His portfolio included the entire Cisco Nexus family, Catalyst 6500, Catalyst 4900 data center switches and blade server switching with multibillion dollars in annual revenues.

Prior to Cisco, Shaikh spent about a decade at Nortel in various IP networking roles. During his 17-year IP networking career, Shaikh has held leadership roles in product line management, marketing and engineering.

Shaikh has master's degrees in engineering and business administration.
